

Angel Hiram Gabriel Gutiérrez

Nogales, Sonora · [linkedin.com/in/hiramgabriel](https://www.linkedin.com/in/hiramgabriel) · +528146826881 · rusty3031@gmail.com

Full-stack developer and programming content creator. I build modern web applications and share my process to help other developers grow. I focus on performance, scalability, and creating products with real impact.

EXPERIENCIA PROFESIONAL

Sthorme

FullStack Software Engineer

Guadalajara, Jalisco

Diciembre 2025 – Current

- I implemented improvements to development and deployment processes, optimizing delivery times and reducing friction in the development lifecycle.
- I designed and developed key business-oriented functionalities, prioritizing performance, scalability, and architectural clarity.
- I participated in the integration of external services and the management of dynamic data, ensuring consistency and efficiency in system responses.

Atrato Pago

FullStack Software Engineer

Zapopan, Jalisco

August 2024–March 2026

- I supported the development of functionalities for both internal tools and end users, contributing to improved operational efficiency and product experience.
- I collaborated on the implementation of new features, integrating APIs and ensuring the correct flow of information between systems.
- I participated in the continuous improvement of the code, resolving incidents and optimizing processes to achieve greater stability and performance.

Vopper

FullStack Developer

Hermosillo, Sonora

December 2024–July 2025

- I assisted in the development of web interfaces, focusing on accurate data visualization and user experience.
- I implemented client-side functionalities, consuming APIs and ensuring seamless integration with the backend.
- I collaborated on the development and improvement of reusable components, maintaining consistency in design and code structure.

LinkTIC

Frontend Developer

Bogotá, Colombia

April 2023–January 2024

- I developed web interfaces focused on usability and user experience, ensuring the correct implementation of designs and flows.
 - I implemented client-side functionalities by consuming APIs and efficiently managing state.
 - I collaborated on the development of reusable components, maintaining interface consistency and adhering to best development practices.
-
